

Worldwide Security. We protect the things that matter to you.

Worldwide Security is proud to be a preferred security and fire protection supplier for the Diocese of Rockville Centre and its affiliates.

As a DRVC member/affiliate, you receive:

- Free security and fire safety assessment
- Special discounted pricing on all equipment, install, labor and monitoring costs
- Same-day/next-day service

The safety of your property and your congregation is of the utmost importance to you – and to us. Our lineup of product and service offerings give you peace of mind and allow you to stay connected and informed, whether you're at your facility or away.

Security Solutions

Motion Detectors

Motion detectors with keypads immediately respond to the presence of an individual in your facility.

Glass Break Sensors/Transmitters

Glass break sensors notify both you and the central monitoring station operators when a window, door, or other glass barrier has been breached.

Video Cameras

Video surveillance helps you keep an eye on your property, even when you're away.

Safe Protection

A secure safe allows you to protect your valuables.

Burglar Alarms

Stop thieves in their tracks, and immediately be alerted to the situation.

Interactive services

Stay connected 24/7, and have the information you need to stay on top of your facility's security at your fingertips.

Interactive Voice

Interactive voice allows you to deter a suspicious individual loitering in the vicinity of your facility. You can even speak to someone standing at your door from your phone when you're not there.

Remote Doorman

With your mobile or web-enabled device, you have the power at your fingertips to lock and unlock doors in your facility from any location. If you have an important package to be delivered while you are not there, simply use our security systems to open the door.

Total Connect Services

With a computer, phone, or tablet, you have continuous and unlimited access to your facility. We strive to keep you informed, and therefore have security systems designed to provide you with video viewing, real-time alerts, and more.

Fire and Carbon Monoxide Protection

Fire Equipment System Design

Plus, retrofitting, and current system additions – as well as fire department and fire marshal expediting to get your system approved and in place quickly.

System Programming including final commissioning.

Fire Protection Services

Including smoke detectors, sprinkler systems, fire extinguisher services, kitchen fire suppression system services, clean agent suppression systems, fire pump services, and foam suppression system services.

Carbon Monoxide Detectors

Our state-of-the-art Carbon Monoxide detectors will alert you immediately when a leak is sensed so you can get your staff and constituents to safety.

Duct Detection Systems

Your fire alarm system should be engineered to detect smoke, even if flames are not yet present. This helps to stop smoke or other toxic gasses from spreading throughout your facility, preventing a potentially deadly situation.

Voice Evacuation Systems

When a fire occurs, it is important to take every measure necessary to alert those who may be on the premises. One of the most effective ways to do so is through loud audible alerts that inform individuals that immediate evacuation is necessary due to a detected threat.

Stay In-the-Know

With central monitoring services for your fire alarm systems, waterflow, sprinkler systems, and suppression systems – choose to connect your system to the monitoring center via dial-up phone lines, a network (internet connection), or use cellular monitoring technology.

Periodic Inspections & Maintenance. Our technical staff is available for regular inspections and cleaning of your comprehensive fire protection system.

24-Hour Radio-Dispatched Technicians

Available for inspections, troubleshooting, violation removal and repairs of most manufacturers' systems.

Assistance with Fighting Violations

Including help with arranging legal representation for criminal court summons.

Access Control

Card Access Systems and Readers

Easy and convenient security solutions that can be set up to allow varying levels of access to different individuals.

Biometrics Security

Advanced technology that can authenticate and subsequently provide access to your facility through the use of an individual's physical characteristics.

Door Access Control Systems with Magnetic Locks

Keep your doors more secure by replacing the lock and key and installing state of the art magnetic locks that cannot be picked and are capable of keeping doors closed with unmatched strength.

Delayed Egress

By preventing the ability of an unauthorized person to leave the premises for a short duration of time, perpetrators are more likely to be caught as authorities make their way to your facility.

Visitor Management Systems and Analytics

It is essential to have the ability to continuously monitor visitors to your facility, and have transparent data of their whereabouts throughout their stay.
